RE: East Maple Avenue Emergency Sanitary Sewer Reconstruction Project

~~~~~

Beginning Tuesday, February 10, 2009 the Village of East Rochester has contracted with Villager Construction Inc. for the emergency reconstruction of the mainline sanitary sewer. The project will encompass the residences and businesses in the 100-200 blocks of East Maple Avenue, from Main Street to the East Maple Avenue extension at Lincoln Road. The East Maple Avenue section of sanitary sewer is the primary transmission main for the village wide system servicing the majority of our residents. This section of our sewer is over 100 years old.

As part of this project in collaboration with the Monroe County Water Authority, we will be relocating your current water service from the old 6 inch water main that has had numerous breaks over the years, to a newer existing 12 inch water main, and abandoning the older 6 inch water main.

Throughout this project you will receive door hanger notifications from Villager Construction in regards to road closures and water service interruptions whenever possible. Please understand there may be emergency situations that arise when notification will not be possible.

This important project is expected to take several months to complete. Throughout the course of the reconstruction, every attempt will be made to maintain traffic flow and access to and from businesses and residences up and down East Maple Avenue. We appreciate your consideration, patience, and courtesy in advance as we complete this vital upgrade to Village infrastructure.

On behalf of Mayor Koon and the entire Board of Trustees, we are pleased to deliver this critical infrastructure improvement project to the residents and tax payers of the Village of East Rochester. Please call the Village Hall @ 586-3553 with questions. Thank you.
